THIS DOCUMENT WILL CONTAIN RESOURCES PERTAINING TO LESSON 1 OF THE INTRODUCTION TO WEB DESIGN COURSE AT SHAW ACADEMY

WEB BROWSERS

Please do not use Internet Explorer.

Google Chrome is a browser that combines a minimal design with sophisticated technology to make the web faster, safer, and easier.

-Download Chrome

Mozilla Firefox is a free Web browser. Firefox is created by a global non-profit dedicated to putting individuals in control online. Get Firefox today!
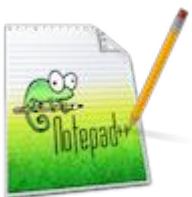

-Download Firefox

MAC OSX

TextWrangler is a powerful and richly featured tool for composing, modifying, and transforming text stored in plain-text files.

-Download TextWrangler

MICROSOFT WINDOWS

Notepad++ is a free source code editor and Notepad replacement that supports several languages. Running in the MS Windows environment, its use is governed by GPL License.

-Download Notepad++

- **The Internet** is our global network of networks.

- **The World Wide Web** is a model built on top of the Internet and uses *HTTP* (*HyperText Transfer Protocol*) to transfer documents on the Web.

- **HTML** (*HyperText Markup Language*) is the language of the Web and it is used to structure and define web pages.

- **HyperText** – Is text that contains links to other published materials.

- **Markup Language** – Is a computer language that uses tags to structure and define elements of a document.
